

Title: Target-Specific Oral Anticoagulation in Clinical Practice: Breaking News, Contemporary Views
Dates: April 29, 2015
Location: Boston, MA

Learning Objectives

Upon completion of the activity, participants will be better prepared to:

- Define the various indications for the use of current and emerging target-specific oral anticoagulants.
- Discuss guideline-recommended approaches to appropriate selection of venous thromboembolism treatment.
- Apply objective, evidence-based risk assessment tools to determine appropriate candidates for stroke prevention in patients with nonvalvular atrial fibrillation.

Target Audience

This activity has been designed to meet the educational needs of physicians specializing in internal medicine and other primary care professionals. This activity will also be of benefit to other healthcare professionals interested in the management of thrombosis with target-specific oral anticoagulants.

Program Overview

Target-specific Oral Anticoagulants: Indications, Similarities, and Differences; The Varying Roles of Target-specific Oral Anticoagulants in the Acute Treatment and Secondary Prevention of Venous Thromboembolism; Stroke Prevention in Atrial Fibrillation: Which Patients Are Candidates for Oral Anticoagulation, and Choosing an Agent Based on Patient Profile; Physician/Patient Education and Resources
